Qorix Expands Into China Through Reseller Agreement With Tranzy

- **Partnership brings Qorix middleware portfolio for software-defined vehicles to Chinese OEMs and Tier-1 suppliers.**

Munich, Germany / Shanghai, China – March 23, 2026 – Qorix, a specialist in middleware solutions for modern vehicle software, announced a reseller agreement with Shanghai Tranzy Group Co., Ltd. The partnership, effective March 18, marks Qorix's first official collaboration with a Chinese partner and represents a strategic step in the company's global expansion into one of the world's most dynamic automotive software markets. The partnership was presented on March 19 at the "5th Software and Security Technology Week" in Shanghai, where Qorix and Tranzy jointly shared the stage and outlined their collaboration and perspective on the future of software-defined vehicles (SDV).

Under the agreement, Tranzy will serve as an authorized reseller for the full Qorix middleware portfolio in China, including AUTOSAR Classic, AUTOSAR Adaptive, the Qorix Performance stack for high-performance computing architectures, and Qorix Developer with AI-based development capabilities. Through the collaboration, automotive OEMs and Tier-1 suppliers in China will gain local access to Qorix middleware platforms designed to support modern, software-defined vehicle architectures.

The transition towards software-defined vehicles is accelerating across the global automotive industry, particularly in China where manufacturers are rapidly advancing centralized computing platforms and service-oriented software architectures. Qorix addresses this transformation with its middleware technologies, enabling automotive companies to manage increasing software complexity while maintaining control over system architecture and performance.

Tranzy will contribute to the partnership by providing technical integration, local customer engagement, and project enablement for vehicle platform programs in China. Leveraging its established network within the Chinese automotive ecosystem, the company will help bring

Qorix technologies into ongoing development initiatives and strengthen access to local OEM and Tier-1 programs.

“China is a key market for the future of software-defined vehicles,” said Caroline Pastjan, Vice President Revenue at Qorix. “Partnering with Tranzy allows us to provide local access to our middleware platforms and work closely with automotive innovators in the region as they build scalable software architectures for next-generation vehicles.”

“Chinese automotive companies are rapidly evolving their software architectures,” said Oliver Ye, CEO and Founder of Tranzy. “By partnering with Qorix, we can offer advanced middleware solutions that help our customers accelerate the development of modern software-defined vehicle programs.”

The partnership reflects Qorix’s broader strategy to expand its global partner ecosystem and support automotive manufacturers and suppliers worldwide in developing scalable, software-driven vehicle platforms.

About QORIX GmbH

Qorix is a technology company that develops innovative, robust middleware solutions for software-defined vehicles (SDVs). We help automotive manufacturers and suppliers manage increasing software complexity while maintaining control over their architecture. Our middleware creates a secure, scalable, and powerful software ecosystem for next-generation vehicles, providing support from platform integration to the long term.

Our portfolio includes AUTOSAR Classic and Adaptive platforms, both of which are TÜV-certified, as well as our proprietary Performance stack for high-performance computers and real-time integration. With a global team of around 300 experts, Qorix delivers software products for leading original equipment manufacturer (OEM) and tier one (Tier 1) programs.

As a joint venture between KPIT Technologies, ZF, and Qualcomm Ventures, Qorix combines deep software expertise with comprehensive automotive knowledge. We are members of the VDA, AUTOSAR, and the Eclipse Foundation and actively shape tomorrow's mobility standards.

About Shanghai Tranzy Group Co., Ltd.

Shanghai Tranzy Group Co., Ltd. was established in 2016. It is a software and engineering consulting service company that focuses on the development and promotion of industrial software, as well as collaborative design and computing cloud platforms. We have always been committed to providing comprehensive IT and engineering service solutions based on industrial software applications for manufacturing customers and product development institutions.

The company's headquarters is located in Shanghai, and it has set up branches in Shenzhen, Chengdu, Changchun and Hong Kong. Currently, the company has a professional team with many years of rich experience, dedicated to providing integrated modern product development solutions and specialized engineering services to domestic customers.
